To Whom It May Concern:

High Technology Systems (HTS) is, since many years, a Key Account Supplier for STMicroelectronics regarding component mounting on PCB and EMS manufacturing in general.

In particular, mounting components on test PCB following all Automotive Quality requirements represent a crucial point to qualify any electronic component as Automotive Grade.

HTS Srl is Automotive Certified following ISO-TS 16949 standards and a qualified supplier for STMicroelectronics. HTS has been positively audited also by TIER 1 Companies that are key automotive customers of ST.

New ST products mounted on PCB as Card Edge or Pins Chip Board are the most important Automotive products assembled by HTS. Nevertheless, also evaluation boards for ST new products represent an important part of the activity.

The HTS assembly line is enabled with state of the art equipment, following all Automotive requirements.
